

OMAR ALFAROUK ASHRAF

Backend .NET Developer

omaralfarouk646@gmail.com | +201226801925 | Obour, Egypt | LinkedIn | Github

SUMMARY

I'm a Back-End Developer passionate about building clean and efficient APIs using ASP.NET Core Web API. I've worked with C#, EF Core, Dapper, and SQL Server, and I enjoy designing scalable solutions that actually solve problems. I've been part of real projects and active in tech communities like IEEE and ICPC, which helped me grow technically and build strong teamwork skills. I'm always looking to learn more and take on new challenges in the field.

EDUCATION

Bachelor's Degree in Information Systems, OUST - Obour University for Science & Tech. 09/2022 – Present

Professional Experience

Middleware Academy, Back-End Mentor (Part-Time) 07/2025 – 10/2025
Guiding students through backend development using ASP.NET Core Web API, C#, EF Core, SQL Server, LINQ, AutoMapper, JWT, RBAC, and clean architecture patterns.

INTERNSHIP

Elevate Tech Bootcamp – Backend .NET Intern, • Studied and applied architectural concepts including Modular Monolith vs Microservices. • Worked with Strategic Design concepts such as Bounded Contexts and Aggregates. • Built backend services using ASP.NET Core (Minimal APIs & Web APIs). • Implemented messaging patterns using RabbitMQ for inter-service communication. • Applied caching strategies (In-Memory, Redis, Distributed Caching). • Practiced CI/CD pipelines using Azure DevOps and GitHub Actions (basics). • Used API Gateway patterns for routing and service aggregation. • Collaborated using Agile methodology and SDLC practices. • Used industry tools including Git, GitHub, Jira, Trello, Postman, Swagger, and Slack. 08/2025 – Present

TRAINING & COURSES

Back-End Web Development with ASP.NET Core, Route Academy 10/2024 – 05/2025
Internship Back-End Development with ASP.NET, Information Technology Institute (ITI) 09/2024 – 10/2024
Intro to Programming, Route Academy 06/2024 – 10/2024
Internship Front-End Web Development, Information Technology Institute (ITI) 08/2023 – 09/2023

TECHNICAL SKILLS

Programming Languages

C#, JavaScript, C++

Front-End Basics

HTML5, CSS3, JavaScript, Responsive Design

Version Control & Deployment

Git, GitHub, GitLab

Development Practices

MVC Architecture, Agile Methodologies, Clean Code Principles, Unit Testing (basic)

DevOps & CI/CD

Azure DevOps (CI/CD basics), GitHub Actions, Docker (basic if true)

Problem solving

Pupil rank on Codeforces

Back-End Development

ASP.NET Core, ASP.NET MVC, Entity Framework Core, Dapper, LINQ, RESTful APIs

Databases

SQL Server, MySQL, PostgreSQL (basic)

Tools & Platforms

Postman, Figma, Visual Studio, Visual Studio Code

Architecture & Concepts — Competent

Modular Monolith, Microservices, API Gateway, DDD (Basic), Messaging Systems

Messaging & Caching

RabbitMQ, Redis, Distributed Caching

PROJECTS

Dashboard System, ASP.NET MVC | SQL Server | EF Core

Designed and implemented a dashboard for managing and analyzing system data. Used C#, EF Core, LINQ, SQL Server, and MVC architecture for structured data flow.

E-Commerce Website, ASP.NET Core Web API | SQL Server | EF Core | REST APIs

Built a full-featured e-commerce backend with product management, user authentication, and order processing using C#, EF Core, LINQ, SQL Server, and RESTful APIs.

E-Learning Platform, ASP.NET Core Web API | PostgreSQL | EF Core | REST APIs

Built a modular backend for an online learning platform with course management, user enrollment, quizzes, and role-based access control (RBAC). Used PostgreSQL with EF Core for database design and LINQ for data handling.

Flowers Store Application, ASP.NET Core | Microservices Architecture | RabbitMQ | Redis | API Gateway

- Developed backend microservices for products, orders, and users.
- Implemented asynchronous communication using RabbitMQ.
- Applied Redis caching to improve application performance.
- Used API Gateway for routing and service aggregation.

Fitness Gym Management System, ASP.NET Core | Microservices Architecture

- Built backend services for managing members, trainers, and subscriptions.
- Applied domain-driven design concepts such as bounded contexts.
- Collaborated within an Agile environment during development.

ACTIVITIES & COMMUNITY INVOLVEMENT

Vice Lead – Backend Track, Vice Lead – Backend Track

01/2025 – Present

- Assisted in leading the backend track and organizing technical activities.
- Helped in preparing backend learning materials and mentoring junior members.
- Contributed to technical sessions related to ASP.NET Core and backend fundamentals.
- Collaborated with the team to organize events and workshops.
